

# Software Development Intern

Tekkstudio is a digital solutions company building modern web applications powered by AI and cloud technologies.

We're looking for a **curious, motivated intern** who's eager to grow their full-stack development skills through hands-on experience on real client and internal projects.

You'll work with a small, supportive team to design, build, and deploy web applications while learning how AI can accelerate software development and improve team workflows.

---

## Responsibilities

- Build and maintain features for **Django REST APIs** and **Vue 3 / JavaScript** frontends.
  - Support **integration with AWS services** such as Lambda, API Gateway, and S3.
  - Collaborate on design and usability improvements for real client-facing products.
  - Write, test, and review code using **Git and GitHub**.
  - Use **AI-powered tools** for code generation, debugging, documentation, and testing.
  - Participate in code reviews, stand-ups, and project discussions with senior developers.
- 

## Preferred Technical Skills

- Experience with **Python** and **JavaScript** (or TypeScript).
  - Familiarity with **Django/Django REST Framework**, **HTML/CSS**, and a modern frontend framework like **Vue** or **React**.
  - Understanding of **REST APIs** and **Git/GitHub workflows**.
  - Bonus: exposure to **AWS**, **SQL**, **AI developer tools**, or **TailwindCSS**.
- 

## Learning Opportunities

- Real-world full-stack experience using **Django + Vue 3**.
- Introduction to **cloud computing** and **CI/CD** workflows.
- Practical exposure to **AI-enhanced development tools** and automation.
- Mentorship from experienced developers and detailed code reviews.
- Learn how to build scalable, production-ready applications from concept to deployment.

---

## Qualifications

- Student or recent graduate in **Computer Science, Software Engineering**, or a related field — or a **self-taught learner** with demonstrable coding experience.
- Some background in programming through coursework, personal projects, or internships.
- Interest in **full-stack development, AI-assisted workflows, and cloud technologies**.

---

**Location:** Remote

**Duration:** 3–6 months (with possible extension based on performance)

**Compensation:** Stipend or allowance; may be reviewed based on contribution

---

## Why Join

This internship is designed for growth — you'll gain **real project experience**, learn how modern software teams use **AI and cloud technologies**, and receive direct mentorship to help you become a confident developer ready for industry roles.

---

## How to Apply

Send the following to [careers@tekkstudio.com](mailto:careers@tekkstudio.com):

- Your **resume (PDF)**
- A short paragraph on **why you want this internship** and **what you hope to learn**
- Any **project links or GitHub repositories**
